After you watch: finish the sentence

6. The independent variable in Damon's experiment was…

The independent variable was _____. **the amount of sugar he ate**

Goes with the class "A9 That Sugar Film questions (Edpuzzle in her class)" (5 pts). Same points when complete. Her sheet has 24 questions with many exact numbers (teaspoons, kilos, prices). We kept the main ideas and the variables question; number answers should be checked with her key.

💗 The film tracks one man's weight gain. We left out the weight numbers. Don't ask students about their own weight.
